

Value Drug Mart

Peace River Value Drug Mart is an independent pharmacy that has evolved from Peace River Drug Company first established in 1916. We are a family run pharmacy since 1973 with the current ownership since 1996. We are proud of our place in the community of Peace River that has a population of approximately 6500 but has an extended drawing area of much larger with many acreage communities and smaller towns that surround it. Where is Peace River? The town is located about 500km northwest of Edmonton. While Peace River is a fair distance from Edmonton the area offers many recreational activities, art and cultural events, and sporting events. Check out <https://mightypeace.com> to see what our area has to offer.

Our pharmacy currently has 4 full-time pharmacists and 1 part-time pharmacist. We have 2 full-time and 1 part-time registered technicians and 4 assistants that have extensive pharmacy experience. We are a busy pharmacy but feel we are well staffed to allow our pharmacists to practice to their full scope and are able to serve our diverse patient base to the best of our abilities.

We offer AADL services (compression stockings, braces, ostomy and incontinence supplies, walkers). We do compliance packing for the community and congregate living areas both in blister packing and pouch packing. A Script Pro robot was added in 2022 to help with the prescription volume and create more time for pharmacists to provide patient services (injections and immunizations, patient medication and travel consultations, and point of care services). We have a level c compounding lab and provide compounding services to other pharmacies.

Being an independent pharmacy has allowed us to be progressive without the restrictions of a corporate head office. We are aware of the need for work-life balance and are sensitive to the professional and family aspirations of all of our staff members. We treat our employees as family and encourage everyone to work to their full potential.

if this practice environment appeals to you, please contact us as we are looking to add another full-time pharmacist to our team.
